DETAILED ACTION

1. Claims 5-9 are pending in the instant application.

Response to Arguments

2. Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.

Claim Objections

3. Claims 5-9 are objected to because of the following informalities:

Regarding claim 5, the claim is objected to because a method is claimed, however, no steps for the method are provided. Rather, the method comprises means.

Regarding claim 6, the claims are objected to for the same reasons as applied to claim 5 above.

Regarding claim 7, the claim is objected to because it depends upon claims "1, 2", however, neither claim 1 or 2 is present in the application. Furthermore, dependency of a claim may only be made in the alternative. In this case, one is unable to determine if the dependency is upon claim 1 or 2, or upon claims 1 and 2. Additionally, the claim is rejected for the same reasons as applied to claim 5 above.

Regarding claim 8, the claim is objected to because one is unable to determine if the claim depends upon claims 5, 6, and 7 in the alternative or collectively. Further, the claim is objected to for the same reasons as applied to claim 5 above.

Regarding claim 9, the claim is objected to for the same reasons as applied to claim 8 above.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 5-9 are rejected as failing to define the invention in the manner required by 35 U.S.C. § 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The **structure** which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as *to present a complete operative device*. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

6. Claims 5-9 are rejected under 35 U.S.C. § 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the structural interconnections between the various claimed means.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
